February 20, 2018

Dear Mr. Kashish Jain

It is our understanding that you have received a letter from the Dean of the Graduate School at Clemson University granting you admission into the Master of Science (MS) program in Electrical Engineering (425) beginning in the Fall 2018 semester. Congratulations on your admission into the program. I believe you will find the graduate program in electrical and computer engineering at Clemson both academically challenging and professionally rewarding. The faculty and staff of our department look forward to your participation in our program, and we are committed to providing an environment conducive to your success in your educational pursuits. Please read carefully each of the following items; they contain information that will help you understand what to expect as you prepare for and begin your program of study at Clemson.

Deferral of entry into the program

You may request a deferral of entry into our graduate program of up to one year through a written request to our department. (For example, if you are admitted for entry in Fall 2018, you may request a deferral of entry to Spring 2019, Summer 2019, Fall 2019.) The request must be received in time for deferral to be granted prior to the start of your original entry date.

Visa Issues

All matters related to visas and I-20 forms for international students are managed by the Office of Global Engagement (OGE) at Clemson, not our department. Any questions on these matters should be addressed to the OGE.

Your focus area

Your application has been carefully reviewed by our faculty based upon your expressed interest in Intelligent Systems as your focus area of study. The ECE department graduate student handbook provides detailed information concerning the various focus areas and the specific core course requirements for your focus area, major (computer engineering or electrical engineering), and degree program (Master of Engineering, Master of Science, or Doctor of Philosophy).

Once you have enrolled in the program, you may request a change your area of focus. Acceptance criteria for such a change vary from one focus to another, however; there are also limitations on our resources which may restrict our ability to allow students to change to a particular focus area. If you desire to be considered for another focus area once you are enrolled, it will be necessary for your application to be reviewed once again by faculty in the new focus area. You should understand that there is no assurance that you will be accepted in another focus area.

HOLCOMBE DEPARTMENT OF ELECTRICAL AND COMPUTER ENGINEERING

Your academic advisor

Your initial faculty advisor will be Brooks, Richard R, who will assist you in selecting courses for your first semester of study. If this letter indicates below that you have been assigned undergraduate course deficiencies as part of your admission, your initial advisor will assist you in developing a plan to address the deficiencies.

Undergraduate course deficiencies

Each student entering the graduate program in electrical and computer engineering at Clemson is expected to possess a core undergraduate-level background in the student's major comparable to that provided by an ABET-accredited B.S. degree in the major.

For each student admitted into either of our graduate majors who lacks a degree in the same major from an ABET-accredited program, the student's prior academic record is evaluated at the time of admission to determine if there are any deficiencies in the prerequisite undergraduate background. Any deficiencies that have been identified for you are listed at the end of this letter. They are expressed in terms of the equivalent undergraduate courses at Clemson.

Keep in mind that our initial assignment of deficiencies for you (if any) is based primarily on an assessment of the transcript(s) you provided with your application. We realize that course titles sometimes do not convey fully the content of a course. If you believe a deficiency has been assigned to you incorrectly, you can provide us with documentation of your relevant background once you enroll in our program and request a reconsideration of the deficiency. In any case, each deficiency must be remedied before completion of the graduate program here. The most common approach to correcting a deficiency is to pass the corresponding undergraduate course at Clemson (while enrolled as a graduate student), but other options are available. You should plan to discuss any deficiencies with your initially assigned advisor when you arrive at Clemson.

Financial Assistance

The department administers teaching assistant positions which normally involve teaching undergraduate laboratory courses or providing grading assistance for our lecture courses. Each year we are able to commit some assistantship offers in advance, but due to limited resources many entering students do not receive advance offers. If you do not receive an advance offer there is some possibility of support after you have been enrolled for at least one semester, but support is not guaranteed. Each accepted applicant is automatically included in the pool of graduate students who are considered for a graduate assistantship; there is no need to submit a separate request or application to be considered for an assistantship.

There are also some research assistantships available from individual faculty members who have grant or contract support. Generally, students are chosen for these positions through individual negotiation with a faculty member after completing at least one semester of study. Be aware that without an advance offer of financial support many of our students are unable to obtain assistantship support from the ECE department after entering the graduate program and must provide their own support.

Congratulations on your academic achievements thus far, and congratulations that you have satisfied our rigorous admission requirements. I sincerely hope that you will be able to join our graduate program. Should you have additional questions please contact Mrs. Jennifer Gooch who is the department student services coordinator for the ECE graduate program (jdgooch@clemson.edu).

Sincerely yours,

Harlan Russell, Ph.D.
