## Policy of Water Conservation

### Introduction

Swami Vivekanand College of Engineering (SVCE) is committed to sustainable practices, with a particular focus on water conservation. This policy document outlines the strategies and measures adopted by SVCE to promote and implement effective water conservation on campus.

### Objectives

- To reduce water consumption and promote the efficient use of water resources.
- To implement rainwater harvesting systems for sustainable water management.
- To raise awareness about the importance of water conservation among the college community.

### Rainwater Harvesting Systems

SVCE has installed rainwater harvesting systems to collect and utilize rainwater efficiently. The harvested rainwater is channelized through a recharge well, which is constructed to allow storm water to infiltrate the soil. This system not only helps in replenishing groundwater levels but also reduces the dependency on external water sources.

### Awareness for Water Conservation

SVCE demonstrates its dedication to water conservation through various awareness initiatives:

- **Posters with Slogan "Don't Waste Water":**

- The college has implemented posters bearing the impactful slogan "Don't Waste Water" at water sources. These posters serve as constant reminders to the college community about the importance of preserving water.
- These initiatives aim to raise awareness about the significance of water conservation and to inspire proactive measures among students, faculty, and staff.
